## Inquest on Death of Jacob Symla

Killed by Rock While Preparing to Place Prop in Position in International Mine.

That Jacob Symla was killed by a fall of rock in Room 18, B level, on July 21, at 8 p.m., with no blame attached to anyone, was the verdict of the jury at the inquest on Friday evening in the council chamber, conducted by Coroner A. M. Morrison.

Jurymen were W. Bell, foreman; Tom Lloyd, J. Poole, E. L. King, W. Dutil and J. Kerr.

James Denholm, working partner of deceased, stated he had known Symla for four years, and he was a careful miner and good at his work. He was about three feet from him holding a mine prop, while Symla was clearing the hole into which it was to be placed. He was in a stooping position, shovelling, when without warning a mass of rock fell, doubling Symla beneath it. He uttered only one word, "Jim," after being struck.

Realizing the hopelessness of trying to extricate his partner without help, the rock weighing over a ton, he hastily called others working nearby, and it required eight men to lift the rock. It was not more than 15 minutes before they got the body from beneath, but life was extinct. Denholm received quite a shock from the accident, although he was uninjured, a corner of the rock just scraping his heel as it fell.

Arthur Jones, fire boss on duty at the time, stated he examined the place where they were working at 6:30 p.m. and there was no indication of the place being unsafe. He sounded the roof and it appeared solid.

Other witnesses examined were William Raymond and Vic Siaka, who were among those who assisted in extricating Symla.

Dr. Borden gave evidence on meeting the stretcher party coming from the scene of the accident. There were large bruises on left upper chest and on back and lower left leg. No autopsy was performed, but in answer to a question by the Coroner, he stated that the blow on the back might have broken it. He would not state definitely which of the particular injuries caused death.

Arthur E. Graham, mine surveyor, submitted plan to the jury, showing the location and description of the rock which killed Symla, it being ap-

Jacob Symla

approximately 5½ by 3½ feet and about a foot thick.

### FUNERAL WAS HELD SATURDAY

Many attended the funeral services held in Holy Ghost church on Saturday afternoon, the Rev. J. T. Dunbar officiating. Fraternal organizations and the many friends of the family. The pall-bearers were Albert Bindu, K. Bator, M. Kypien, M. Biela, F. Bajajedvic and J. Dziedzic.

Deceased had lived here for twenty-five years, coming from Poland. He returned there after working here several years, and brought his wife and children to live here. His wife died in 1929. Members of the family living are Mrs. Walter Glawacz, of East Coleman; Joe, 16 years; Annie, 13 years, and Alice, 15 years. A brother, Martin, also lives here. Symla was a pioneer member of the Polish Society, and was highly respected not only among his own countrymen but by all who knew him during the time he worked here.

### CARD OF THANKS

The family of the late Jacob Symla wish to thank all those who were so kind to them during their recent and bereavement, the passing of their beloved father; also those who loaned cars or in any way assisted them.

Floral tributes—Joe, Alice and Annie, Mr. and Mrs. Walter Glawacz and son, Tom Sygutek and daughter, Mr. and Mrs. Ziajka and family, Mr. and Mrs. Martin Symla, Mr. and Mrs. Joe Symla, Mr. and Mrs. E. Richard, Mr. Mike Kish and daughter, Mr. and Mrs. Dlugosz and Johnny, Mr. and Mrs. Frank Vincent, Mr. and Mrs. Joe Spievak, Mr. and Mrs. Johnny Stevialk, Jr., Tom and Annie Rypien and daughter, Mr. and Mrs. Charles Nicholas and family, Mr. and Mrs. Biegan and family, P.T.B.P. Society (Bellevue), P.T.B.P. Society, N.S.V.P.S. Society, T.N.F.J. Society, N.S.V.P.S. Society, Catholic Sokol Society.

### BENEFITS OF HOME IMPROVEMENT LOANS

"When everything was complete and I paid the lumber account I was very agreeably surprised to find that by paying cash there was a discount of approximately \$20. The bank had charged \$6.50 for the loan, so I reasoned that by using the bank's money, made available under the Government Home Improvement Plan, and paying cash, I had saved \$18.50 which I could not have done otherwise."

"The arrangements with the bank and the improvements which have been made, have both proven so satisfactory that I am negotiating for another loan, this time to paint the house, porch and garage, which will complete a very satisfactory improvement to my home, thanks to the government and the co-operation of the banks."

The foregoing is from a letter of a man who took advantage of the H. I. P. See your banker for details, or H. T. Halliwell.

The Misses Margaret and Olwyn McLeod, Anne Spievak and Ferina DeCocco are spending a holiday at Spokane.

Mr. and Mrs. Mrs. Moffatt of North Fork attended the Deshotel funeral on Wednesday.

## Half Century Of Mining Career Ends For Thomas Badham

(Drumheller Mail)

After following the vocation of miner for forty-seven years, Thomas Badham, fire-boss at the Midland mine, laid down his tools for the last time on Friday, and ascended the shaft in the cage on that day, to mark his retirement from active mining. Of his forty-seven years at mining, he has spent 30 of those years in the coal fields of Alberta, and had been fire-boss at the Midland for the past eight years.

On his retirement, Mr. Badham was presented with a hand some travelling bag at a banquet tendered in his honor recently, at which his companions at the mine bid him farewell. Accompanied by his wife, Mr. Badham left on Saturday to spend a short time in Calgary, and will later proceed on to British Columbia, where they will spend the eventide of their lives.

Commencing his mining career in South Wales, Mr. Badham came to Canada in 1906 and for twenty years was employed at Coleman, leaving that point to work for four years in the Alberta coal branch district. Coming to Drumheller in 1929, he accepted the position which he occupied until his retirement, as fire-boss.

## Worthy Coleman Couple Honored on Their Golden Wedding Day By Family and Many Friends

—Photo by Gushul Studios, Blairmore

Mr. and Mrs. Alex. Fyfe Receive in the Royal Alexandra hospital, Edmonton. Congratulations of Family and Friends at Big Gathering.

Highly respected and loved for their sterling qualities by a wide circle of friends in the Crow's Nest Pass, Mr. and Mrs. Alex. Fyfe were honored by a large gathering in the Odd Fellows hall on Friday evening, July 22nd. Members of the family present were Mrs. David Robert, Mrs. George Ford, Mrs. Alex. Morency and Mrs. Roach Oliver, the latter two of Blairmore, and the husbands of these ladies, daughters of Mr. and Mrs. Fyfe. In addition there were thirteen grandchildren and one great grandchild. One grand-daughter, Miss Margaret Robert, was not present, being a nurse

address by Mr. George Kellock, songs by the Misses Isa Ramsay and Mamie McEllan, recitations by Mrs. Robert Holmes, and music by Blyth's orchestra. A presentation by the Caledonian Society consisted of a silver bowl filled with carnations, and a purse of the same Society.

An interesting feature was a wedding scene, the characters being portrayed by Lillian and Norman Ford, grandchildren, as a tribute of affection on behalf of all the children present. The evening concluded with a dance, supper being served by the ladies of the Caledonian Society. Not only from the family, but from their many friends good wishes are extended on this 50th wedding anniversary.

The evening's program included an

## Town Council Notes

The council met on Tuesday, all members present, Mayor Patterson presiding.

The Light and Water committee were given power to act in connection with water being supplied to several applicants for service in the east end of town.

A letter was ordered to be sent to the highways department requesting that the highway from Maple Leaf to Coleman be hard-surfaced, and that the town clerk of Blairmore be notified that this is being done.

A motion was passed to the effect that Charles Sartoris be notified to send in an application to open for business in Coleman, and that until same has been received and permission given, he cease operating.

All parties keeping cows on town lots will be refused the right to sell milk and compelled to dispose of their cows, unless they comply with the Provincial Dairy Act. A motion was also passed that the health report of Dr. Borden be published in the Coleman Journal.

Grants were made to the town band of \$50 for sheet music, and to the Coronation committee, \$20, to make up the balance required to pay for the Coronation mugs ordered for the school children, which will be distributed after school reopens.

The report on roadwork by the Works and Property committee, also the letter from J. S. D'Appolonia regarding same, were accepted on motion.

The report of R. B. Ritchie, municipal inspector, was ordered to be left in the mayor's and secretary's hands to be attended to. The health officer's report was also laid on the table till next meeting, when Constable further announcements in this Antle will report on conditions.

On motion, the secretary was instructed to forward a letter of sympathy to Mr. E. D. Battarm, town auditor, on the death of his wife in Calgary.

Certain relief matters were left to Constable Antle to attend

## Saturday Night Fracas Brings Serious Charge

Coleman Man Accused of Causing Grievous Bodily Harm to Companion Outside Liquor Store.

Joe Rucka of Coleman was arrested on Saturday evening shortly after 8 p.m. and later released on bail of \$500.

According to an eye-witness, who had been talking to the attack, Rucka was seen to strike Fox and he stumbled to the attack, where blood was noticed coming through his clothing. Examination showed a wound a few inches long below the heart. He was immediately taken to the hospital and the wound stitched, later proceeding home.

The case came up for hearing on Tuesday morning before Police Magistrate Gresham. R. F. Barnes conducted the prosecution for the town; J. S. Bannan appeared for the injured man, and M. Moscovich of Lethbridge appeared for the accused. Owing to Mr. Moscovich having planned his holidays just prior to being engaged by the accused, he asked for an adjournment till Aug. 27, which was granted.

The maximum sentence for a serious charge of this nature is three years.

Dr. and Mrs. S. Brown and two grandsons, of Granville, Ill., and Mr. and Mrs. T. M. Brown of Spring Point, were the guests of Mr. and Mrs. T. Holstead on Wednesday.

The newly opened ladies wear department of Frank Abousa-fy's store provides an opportunity to purchase many fine articles in ladies wear. Look for next meeting, when Constable further announcements in this paper.

to, such as wood, light and water for an indigent person.

For the use of the town, truck by International Coal Co. a charge of 75c per hour will be made.

## Coleman Players -- Tennis Tourney

Coleman tennis players made a good showing at Lethbridge last week in the southern Alberta tennis tournament. Balloch, an event which has been won and Roughwood won the men's since its inception two years ago by Coleman players, will again be defended by the three local entries. Shone is present title holder.

M. McLeod and Balloch. The McLeod sisters in their first major tournament made a creditable showing, entering the finals of the ladies doubles only to lose to a Lethbridge combination.

Roughwood won the consolation singles final easily after having been defeated by Bob Wise of Calgary in the opening rounds of the open singles event. Wise is the player who defeated Roughhead in the final of the Alberta junior singles two years ago at Calgary. Shone failed to make much headway in the singles event but played skillfully in the men's doubles event to defeat Hincks and Stark of Calgary to meet Balloch and Roughhead in the final, where he and his partner were defeated.

E. H. Whitehead, of New Jersey, who is making a leisurely tour of the country while traveling to Los Angeles, proved too good for Balloch, defending champion in the men's singles, and won 7-5, 6-3 in the semi-finals, and beat Bob Wise in the final to the title. Whitehead is entered in the provincial tournament being held at Calgary on Monday.

Frank Sharp, local junior, failed to have enough experience in his first tournament, and was defeated by a Medicine Hat player. The experience gained at this tournament will enable him to make a better showing next year.

Leaving for Calgary this week-end to attend the provincial tournament will be Shone, Jenkins and Balloch. Shone and Jenkins

### Coast-to-Coast Flight

A Montreal to Vancouver flight will be made by Minister of Transport Howe on Friday, between daylight and dark. The plane, with Squadron Leader Tudhope, will probably pass over here during the late afternoon. It is probable that a stop will be made at the landing field here on the return trip. Charles Aitkens, departmental operator, is now in charge of the radio station at the airport, and Operator Bates will return east. The new operator came here from the radio station at Estevan, Vancouver Island.

Joe Spievak's bright new grocery store with its new stock in the Ferrera building at the west end of Main street will welcome your orders. Telephone 219. Ad

## COLE'S THEATRE BELLEVUE

Thursday, Friday and Saturday July 29, 30 and 31

Mary Pickford and Jesse L. Lasky, present

"The Gay Desperado"

with the famous Oper Star NINO MARTINI

If you want a thrill come and hear him sing Verdi's "Celeste Aida"

A triumphant golden-voiced star of the Metropolitan Opera ... as a laughing, carefree singer ... as a beautiful and making love to beautiful girls.

Monday, Tuesday, Wednesday August 2, 3 and 4

BIG DOUBLE PROGRAM

Ricardo Cortez, Bella Lugosi and Patricia Ellis in

"Postal Inspector"

and Edmond Lowe and Constance Cummings in

"Seven Sinners"

Thursday, Friday, Saturday August 5, 6 and 7

CHARLES LAUGHTON as

"REMBRANDT"

## Rehabilitation Versus Relief

What Western Canada needs most to-day is employment for the large army of jobless congregated in the cities and towns and scattered throughout the rural districts, and some well-defined and ambitious plan of insurance against a repetition of continued drought conditions, or at least some scheme which will mitigate the effects of future periods of inadequate moisture.

These two great needs should, if possible, be hooked up together through a program of public works designed both to alleviate the present unemployment scourge and at least reduce to a minimum tremendous crop failures losses which may, and probably will be occasioned by drought cycles in the future.

That drought will again take toll of the products of the farm in the future, distant or not so distant, there can be no doubt, for history has demonstrated without peradventure that cycles of dry years inevitably follow periods of abundant moisture and there should be no feeling of false security on the part of the residents of those sections which are this year enjoying the benefits of copious rains.

With many of its districts hard hit over a period of unprecedented length, Saskatchewan is bearing the brunt of the shock this year with a crop failure of record proportions, and part of Alberta is again feeling the weight of drought. Manitoba has escaped devastation from lack of moisture but there is no guarantee that the most easterly of the prairie provinces, along with the other two, will escape another drought debacle next year or at some future time.

Some palliative may be adopted in the form of changed cultural methods which may have some effect in ameliorating the effects of drought, but even these will not avail in the face of continued dry weather over a long period of time, and the possibility of such contingency in the future must be faced and, if possible, coped with.

Unless some project which will ensure sufficient moisture to guarantee a reasonable amount of grain and fodder crops can be devised and put into operation for use in a season of shortage, the future of agriculture on the prairies is by no means assured.

While the construction of dams on small streams and dugouts on individual farms designed to conserve waste water has some value in some seasons, they are of little use if there is no precipitation to feed them and under those conditions such schemes are merely nibbling at the problem.

What is needed is some wide-embracing project, which may, it is true, cost a lot of money, but which will provide sufficient water for irrigation on a large scale. Enormous quantities of water flow down the slopes of the Rocky Mountains when the snows melt and escape to the sea in addition to the large amount which is lost through evaporation at a season when such moisture would be a valuable aid to agriculture on the prairies. Thought should be given to the engineering and economic feasibility of capturing and impounding as much as is feasible of this lost water so that it may be turned to the needs of agriculture.

If some such scheme is found feasible, the question of cost should not be allowed to stand in the way, even if it costs hundreds of millions of dollars. The loss of one single crop in Saskatchewan alone is equivalent to the disappearance of \$300,000,000 and all that that implies, to say nothing of the resultant expenditure for relief, amounting to many more millions for which, under the direct relief system, there is no return.

But in addition to the dividends, which a feasible project of this nature might well be expected to yield in assured crops, a plan of this kind would also, during the construction period, provide a great deal of work for large numbers of unemployed, thus helping to solve the other great problem which still faces the peoples and governments of the country. The completion and operation of such a project, if of adequate proportions would ensure a reasonable measure of prosperity to such sections of the agricultural country as could be brought under its benefits, and this in itself would go a long way to lessen the unemployment problem in the urban centres.

Governments have too long been prone to take the easy way of tackling a big and dual problem by voting sums of money for direct relief, as a result of which the problem is no nearer to its solution than when it first reared its head several years ago and, in the meantime, millions of dollars have been expended and there is nothing to show for it.

Continuance of direct relief without exacting some return for the expenditure also creates a moral problem which will have to be solved and that is the loss of incentive to work even when it is available.

Fortunately the people of the west are keenly alive also to this aspect of the question and the demand for the substitution of work with wages for direct relief, or as the mayor of one western city recently put it, "rehabilitation instead of relief," is becoming more dominant every day.

People generally realize that if private capital is unable or unwilling or afraid to provide work that it must be done by the government at least until conditions in the West have improved to such an extent that industrial confidence is restored.

"I'm afraid you'll be late at the party," remarked an elderly lady to her granddaughter. "Oh, dear, grandma," said the girl, "don't you know that in a fashionable set nobody goes to a party until everybody has got there?"

"This is a very small bit of chicken you have given me, waiter," complained the diner. "Yes, sir," replied the waiter, under notice anyhow, "but you will find it will take you a long time to eat it."

So elastic is pure wool that in a laboratory test, a single fibre of it will stretch to 170 per cent. of its length and then snap back to normal.

An observer in a two-hour tour around London counted 56 people who walked under ladders, 41 women and 15 men.

## Water Transportation In North

### Two Modern Vessels Now Plow Waters On Mackenzie River

Marking a new era in water transportation to the Canadian Arctic, the flagship "Radium King" of Northern Transportation's Mackenzie River fleet, started on her maiden voyage to Fort Norman.

Of welded steel, nearly 100 feet long, with powerful diesel engines, refrigeration chambers to carry meat, fresh vegetables and milk, electric light and steam heat, the "Radium King" is the most modern ship ever to ply the waters of the far north. She made her trial trip on Dominion Day after elaborate launching ceremonies. For the event, Hon. J. C. Bowen, lieutenant-governor of Alberta, went north by seaplane with A. "Matt" Berry, famed Arctic flier, who has left the air routes to become general manager of Northern Transportation. Gilbert LaBine, discoverer of the radium deposits on Great Bear Lake and president of Eldorado, flew in from the mine and mining officials, prospectors, traders, trappers and Indians for long distances around, assembled for the event.

Built originally at Sorel, Quebec, the Radium King and the sister ship, Radium Queen, were brought to Waterways, Alberta, by Canadian National Railways, sliced in sections and travelling on an entire train of flat cars. With the ships came a corps of skilled French-Canadian shipbuilders and welders from Sorel. At Waterways they assembled the Radium Queen and, on Coronation Day, the first ship had her first trial trip.

As the ice moved out, the Radium Queen with a large sledge lashed alongside carrying the Radium King, moved down the swift and twisting channels of the Athabasca to Fort Fitzgerald. There, the sections of the vessels were portaged overland for 16 miles by tractor train to the shipyards at Fort Smith. The Sorel crew built the Radium King a second time, thousands of miles from the shipyards where her keel was laid.

## A Lesson For Motorists

### Traffic Engineer Travelled 17,000 Miles Without Once Using Horn

Oscar Gunderson, Chicago traffic engineer, recently reported he had completed a 17,000-mile automobile trip without once using his horn. He said: "That is proof that continual horn-blowing, even in city traffic, is unnecessary to any driver obeying traffic laws."

Engineering training probably developed in this motorist a capacity for deciding promptly in an emergency. During that 17,000-mile trip he said he would have blown his horn if it had been necessary to save human life or to avoid peril to himself. But he did not meet these emergencies probably because he did not dodge out of the line of traffic and sprint ahead in an attempt to gain a rod or two. He didn't cross the centre line and race up hill taking a chance that he might not meet traffic. He did not whirl around a corner and trust to luck not to kill a pedestrian crossing with the green light.

In general, this engineer, skilled in traffic safety, kept his car under control, observed sensible regulations, had regard for the rights of others and had no need to horn-blow his way through this 17,000-mile tour. Probably he took no precautions that might not reasonably be expected of any motorist.—Detroit News.

## Electricity In The Sudan

### Small Shock Given By Nearly Everything You Touch

Going to bed in the Sudan is apt to be exciting, if the stories of blankets electrically charged by the climate are accepted. Now it seems Khartoum appears always to have had a sort of "cracking" reputation. Hair and silken clothing have been liable to respond to the touch with the crackling indications of discharging static electricity. Now it seems that blankets have taken to storing up electricity to the confusion of those who would go quietly to bed.

The phenomenon has been given official recognition, and one manifestation of it has been recorded in the May issue of the Meteorological Magazine. William D. Flower, of the Meteorological Service stationed at Khartoum, writes in that journal as follows:

"On the evening of March 6, 1937, a bed had been made up on an angrareh (native bed made of rope on a wood framework) at about 6 p.m., just about sunset, and when the outside blanket was approached soon after 10 p.m. a spark, which appeared to be at least half an inch long, was observed to pass between it and the person's nose. A sharp prick was experienced at the tip of the nasal organ. In the case of the adjoining bed smaller sparks were observed to pass between the blankets and finger-tips, where a tingling sensation was felt."

It is confessed that such conditions are normal at least during the winter months, and it is presumed that the electricity is caused by the friction of sand particles against each other when they are driven by the wind.—London Times.

## Divers Use He'um

### May Assist In Bringing Up Valuable Treasure From Sunken Wrecks

The use by divers of helium, the non-inflammable gas employed in some airships, may be the means of bringing long-lost treasures of the sunken liner Lusitania to the surface of the Atlantic.

Two deep-sea divers at Milwaukee have been experimenting with the gas in the hope that inhalation of it will overcome "caisson bends"—crippling, sometimes fatal cramps caused by sudden changes of pressure while divers are rising from sea depths.

For almost an hour the divers, Mr. Max E. Nohl, of Milwaukee, and Captain John D. Craig, of Long Beach, California, who said they intended to dive to the Lusitania next August, remained in a chamber under a pressure of 42 pounds to the square inch—equal to the pressure of 100 feet beneath the ocean's surface. Instead of the conventional breathing mixture of oxygen and nitrogen they used almost pure helium.

It was the first time that helium had been used by a human being under pressure, according to a doctor participating in the test.—Sunday Times.

## Thousand Years Ago

It is still considered something of a novelty to transport food by air. But the first shipment of a commodity was made a thousand years ago. The Caliph of Cairo craved a dish of the lush cherries that grew in an orchard about 400 miles away. So 600 carrier pigeons were pressed into service, a small silk bag containing a single cherry being tied to each leg of each bird.

## LANCERS PERFORM IN FANCY DRESS

Taken during a rehearsal for the Aldershot Horse Show, this picture shows members of the 16th Lancers guiding their horses over six young men with parasols. Judging from the postures and expressions the sextette finds the situation anything but comfortable.

## THE WORLD'S MOST FAMOUS FLAVOR

## Just A Simple Matter

### Doctor Claims He Can Actually Cut Out Your Worrying

"Cut out your worrying" is now something more than philosophic advice of perfection or psychological counsel, according to Dr. Walter Freeman of Washington, D.C. It is a simple matter of permitting a competent surgeon to operate on your imagination. Your worrying proclivities can be exercised as easily as your vermiform appendix or your tonsils.

Dr. Freeman recently told the American Medical Association that he had tried it out on 51 patients, of whom 20 had survived the experience. Its benevolent effect is shown by the fact that one man who underwent the operation three hours later sat up in bed and demanded a whole chicken for his dinner. A woman, within a week of submitting to this scientific magic, attended the theatre and enjoyed the show without worry for the first time in years. She was not even disturbed by the fact that her back hair might be less tidily arranged than could be desired.

The surgeon bores two small holes in the patient's skull, inserts loops of wires, rotates them and removes a dozen small spheres of white tissue. By that process, Dr. Freeman claims, the imagination area of the brain is thus reduced in size, and what is left is no longer distressingly excited by over-stimulation. It seems to be a big idea.—Chicago Daily News.

## To Protect Children

### Great Britain Investigates Methods Of Adoption Societies And Agencies

Recommendations aimed at tightening control over the adoption of children in Great Britain were made recently by the majority of a home office committee appointed to investigate the methods of adoption societies and agencies.

After reviewing several cases of indiscriminate trafficking of children the committee suggested:

Adoption organizations should be licensed by local boroughs or county councils;

They should be forbidden to arrange adoptions abroad for any foreigner, or to let a British subject take a child abroad until a magistrate has granted, in open court, a license permitting it;

They should insist that all adopters apply to court for confirmation of the adoption after a probationary period.

Private arrangers of adoptions, parents and the adopters themselves should not be allowed to receive payment without court permission and all advertising by unlicensed agents should stop.

Miss Florence Horburg, member of parliament, was chairman of the committee.

## SELECTED RECIPES

### TOMATO BUTTER

7 lbs. ripe tomatoes  
3 cups white sugar  
1 cup Crown Brand Corn Syrup  
½ cup salt  
½ cup pickling spices (in bag)  
3 cups cider vinegar  
½ teaspoon red pepper  
Method: Scald and skin tomatoes and cut in pieces. Add remaining ingredients and boil gently for three hours. Seal in sterile jars. Makes five pints.

### Soil Drifting

It is estimated that soil drifted from one acre to the depth of one inch is equivalent to the removal of approximately 684 pounds of nitrogen, 155 pounds of phosphorus, and 5,380 pounds of potash. This amount of phosphorus alone is approximately equal to that removed from the soil in the production of 485 bushels of wheat.

Prospective Governors—"I'm not interested in the position. I didn't realize you had a little children."

Mistress—"Don't tell me you are superstitious."

A peck of small metal objects can be electroplated at once with a new machine.

"High tea" is a complete meal, served either in the afternoon or evening, at which tea is served.

## Building Huge Memorial

### Russian Engineers Laying Foundation For Great Palace Of Soviets

After nearly five years of delay, Soviet engineers have started laying the concrete foundation for the great palace of the Soviets, projected as the world's biggest and highest building.

The palace as presently planned promises to be as bizarre a memorial to the Bolshevik revolution as Ivan the Terrible's unique monument to himself in Red Square—the famous St. Basil's Cathedral. The building proper, which is to rise 1,050 feet, will serve as a pedestal for a 325-foot statue of Lenin, shown with his right hand pointing forward in oratorical pose.

(The Empress State Building, Fifth Avenue at Thirty-fourth street, New York, is 1,248 feet high.)

The material for the statue proper has not yet been chosen, but it likely will be of non-rusting metal. In some quarters it is suggested that the great building and monument may be finished within five years, but others believe it will take more than twice that long.

Many Bolsheviks believe and recently have been heard saying as presently designed will not be completed, because they consider it grotesque and ill-fitted to Soviet architecture and the nation's needs.

The projected building consists of three receding cylindrical parts, the upper cylinder serving as the gigantic pedestal for the statue, which Soviet newspapers point out will be visible from below only about ninety days of the year because of the low-hanging clouds over the city.

The main room of the building will be a great hall seating 20,000 persons, designed for sessions of the Soviet Congress. This body previously has met in the great white palace of the Kremlin, where the Russians used to crown their czars.

Plans include dropping the chairs of this room below the floor for conversion of the room into a stage or stadium for sports contests. Another hall will accommodate 5,775 persons. Other space is to be used for smaller meeting rooms, offices and spaces for exhibits.

Tremendous engineering difficulties already have been encountered in construction of the foundation. The building is being built on the left bank of the Moscow River at some distance from the Kremlin on the site formerly occupied by the great Czarist Church of the Redeemer. Excavation already has weakened the foundation of a nearby bridge, necessitating its being moved down the river. Water also seeped into the workings, stopping construction while new plans were drawn.

The decision to resume construction follows sending of a large technical mission to the United States last year to work out engineering problems with American consultants.

## A Strange New Mineral

### Can Be Used In Various Ways And Is Very Cheap

One of the newest and strangest minerals in the world is vermiculite, found chiefly in a mountain in Montana, U.S.A. It combines the qualities of many other minerals. With slight treatment it floats on water and is a high-grade insulator which can be used equally well for electrical as well as steam-pipe work.

If exposed to warmth it expands to about 27 times its original volume and becomes a lovely golden color. It is very light and tough and because of its cheapness and similarity to cork might replace that material. It is also fire-resisting to a very high degree and can be used with safety in construction of furnaces which would melt most metals.—Montreal Star.

Nearly 17,000,000 tons of shipping are handled annually by the principal ports of the Rhine river.

Passenger sea sleds are to ply the Moscow-Volgga Canal in Russia.

## BLACKHEADS

Blackheads go quickly by a simple method that just dissolves them. Get two ounces of peroxide powder from your drugist, rub with a hot wet cloth gently over the blackheads—and you will wonder where they have gone. Have a Hollywood complexion.

# Sir Charles Saunders, Who Originated Early Marquis Wheat, Is Dead

Ottawa.—Sir Charles Saunders, whose Marquis wheat made western Canada "the granary of the world," died quietly at his home here Sunday. He was 70 years old in February and had been in poor health for several months.

He was knighted in 1934 for his service in Canada and the empire in developing the early-ripening Marquis wheat which established Canadian hard wheat as the standard for the world. Sir Charles had been living here in retirement for eight years.

A complication of ailments sent the famed cerealist to his bed two weeks ago. Early on Sunday his condition took a turn for the worse and a doctor and his brother, Henry Saunders of Toronto, were summoned to his bedside. Death came shortly after noon.

Sir Charles was born in London, Ont., and his only sister, Miss W. E. Saunders, widely known naturalist, and his only brother, Henry Saunders, reside, W. E. Saunders, travelling in Quebec, could not be reached in time to come to his brother's bedside. Two other brothers, Percy of Clinton, N.Y., and Fred of Cambridge, Mass., also survive.

While by no means his only achievement in agricultural research, the development of Marquis wheat was Charles Edward Saunders' most seasonal contribution. Canada's wheat fields were being opened in the 1890s when Sir Charles' father, Dr. William Saunders, was head of the Dominion experimental farms and Charles and a brother, A. P., assisted in the work of developing grain strains.

Marquis came about, in fact, through the unspectacular chewing of little quantities of wheat. That was the way Sir Charles tested the gluten qualities of different strains and he finally picked a cross between red fife, and hard Calcutta, imported from India by his father.

The new strain almost immediately became widely accepted and today is grown across the broad areas of western Canada and the United States. Its production has put millions of dollars into the pockets of growers and grainmen of the two countries and has won world recognition.

Sir Charles was graduated from the University of Toronto in 1888 and for a year was professor of chemistry and geology at Central University, Kentucky. In 1903, after his sensational success with Marquis wheat, Sir Charles became Canada's first Dominion cerealist. His work for the Canadian agricultural consisted in painstaking sorting of countless varieties of seeds. He later originated Garnet wheat, a strain more suited to the northern prairies, and it was developed by his successor, L. H. Newman.

**Search Covered Wide Area.**  
Honoahu.—Planes and ships of the United States navy travelled 180,000 miles in the search for Amelia Earhart, Rear Admiral Orin G. Murfin disclosed in a statement expressing belief the aviatrix and her navigator had perished.

## Four Provinces And Ottawa In Agreement On Youth Training

Ottawa.—Agreements with Saskatchewan, Alberta and British Columbia for youth training projects have been approved by the Dominion government, Labor Minister Norman Rogers announced.

All agreements provided the Dominion will spend an equal amount to that spent by the province concerned. The combined Dominion contribution for the three provinces will be "something less than \$300,000," Mr. Rogers said in his statement.

Four provinces have now reached agreement with the Dominion for youth training. An agreement with Manitoba, involving an allocation of \$100,000 by the Dominion, was announced early this month.

The Dominion's contribution comes from an appropriation of \$1,000,000 approved at the past session of parliament for youth training and reconditioning projects.

All agreements apply to unemployed men and women between 15 and 30 years old. They must be necessitous and registered with the

### Earthquake In Alaska

Residents Of Fairbanks Flee From Their Homes

Fairbanks, Alaska.—Half-dressed men and women ran from homes and hotels, from buildings awayed and merchandise tumbled to floors as a strong earthquake struck Fairbanks and the Alaskan interior.

The quake lasted more than a minute. Tremors were recurrent throughout the day. Another severe shock was followed by a third so severe it put the University of Alaska seismograph out of commission.

There were no reports of injuries and estimates of damage were not available.

Concern was felt for persons in the Black Rapids glacier district near the Big Delta river, about 125 miles southeast of here. Communication lines were down and it was felt here the area may have been "greatly disturbed."

It was recalled that tremors were felt there within the last few months, starting the glacier moving forward rapidly again after it virtually had ceased its advance, which had caused apprehension for the nearby Richardson highway.

A survey indicated most damage consisted of broken windows and damaged merchandise.

### Will Not Sacrifice Sailors

Take No Risks To Protect Merchant Ships In Spanish Waters

London.—Alfred Duff-Cowper told the House of Commons that as long as he is first lord of the admiralty, he will not risk the life of a single British sailor to protect British merchant ships in Spanish territorial waters.

Vessels participating in the war cannot expect British warships to give them protection as far as their destination, he said.

"This would mean firing on Spanish ships, entering the war and risking the lives of British sailors for a cause which no man, except those of the Labor benches, think is worth fighting for."

"As long as I am at the admiralty, I am determined that no single British sailor will fall for this cause."

### Buses Replace Street Cars

New Westminster, B.C.—New Westminster has become the first city in western Canada to abandon street cars in favor of buses. A dozen new buses, which will be augmented by nine more when the service is in full operation, paraded the streets to show citizens how they would travel when the new service officially begins.

### Tourists Still Interested

Niagara Falls, N.Y.—Customs inspectors at the Falls View bridge here said that occupants of more than 80 per cent. of the American automobiles which crossed the bridge in one day said they were on their way to Callander, Ont., to see the five famous sisters.

### Defer Trade Talks

Britain Will Not Negotiate With Japan Until Situation In China Is Cleared

London.—Foreign Secretary Eden confirmed to Ambassador Shigeru Yoshida a statement he made in the House of Commons that Great Britain could not open trade talks with Japan until the situation in north China was cleared up.

Ambassador Yoshida was reported as having told Eden any foreign intervention to settle the north China conflict was considered inadmissible by Tokyo.

"During the foreign affairs debate in the House of Commons Eden offered facilities of the British government for mediation if desired by Japan (China)."

It was understood the far eastern crisis was considered by the cabinet, but the meeting ended without any other conclusion that the policy advanced by Eden in the commons to the effect no pressure, other than that which could be exerted through regular diplomatic channels, was to be used.

### Want Banks To Co-operate

Move To Secure Assistance Of Banks To Establish Social Credit

Edmonton.—Move to secure the voluntary co-operation of chartered banks operating in this province in steps designed to establish a Social Credit system is being made "as a preliminary measure in preparation for the session of the legislature that is to take place on Aug. 3," according to an announcement by Premier Aberhart.

Acting upon the advice of the Social Credit board, the government is immediately notifying the bank "of the essential importance and the great expediency of their co-operation in implementing the clearly expressed will of the people of the province," according to the premier. Taxation must be "quickly and drastically removed" if the cost of living is to be lowered, the premier stated.

### Air Route To Alaska

Will Study Possibilities Of Inland Route Through Canada

Edmonton.—Col. Munroe Johnson, assistant secretary of commerce for the United States, and member of the commission recently investigating the Hindenburg disaster, will fly to Edmonton from Great Falls, Montana, with a party of prominent American aviation executives to investigate a possible inland air route connecting with Alaska.

Heralded by aviation experts here as the most significant development in international aviation progress on the continent, visit of the American party is expected to lead to important negotiations between governments and flying companies of Canada and the United States for a connecting mail service through Edmonton to Alaska.

### Sets New High Mark

Gold Output For Canada During May Was \$40,125 Ounces

Ottawa.—The mills of Canada's gold mines ground out a new production record of \$40,125 ounces in May, the Dominion bureau of statistics reported.

At the average price of \$34.94 an ounce during the month in New York the output was worth \$11,853,000. April production of 325,357 ounces had a value of \$11,300,000.

### EUROPEAN SITUATION GIVES PREMIER ANXIOUS MOMENTS

This photograph shows Premier Camille Chateaufort of France being questioned by reporters during one of his hurried visits to the Elysée, where he discussed the European situation with President Le Brun.

### GUGLIELMO MARCONI

Inventor of the wireless, died suddenly of a heart attack at his home in Rome. The famed inventor was 63 years old. He had been in apparently good condition prior to his death, although he had been in ill-health for two years. He died of paralysis of the heart.

### Prospects Slightly Better

Recent Rains May Improve Crop Yield In Many Areas

Winnipeg, Man.—W. Sanford Evans, chief of the Winnipeg statistical service bearing his name, emphasized the western crop may be larger than private estimates now being made. Recent rains had improved crop prospects in many districts and while stems might be short the new moisture would aid the kernels to develop and bring increased yields.

Doubtfully, said Mr. Evans, the western crop will be small. "But I have too much respect for wheat to buy it before it is dead," he said. In 1924, he recalled, many fields in mid-July virtually were abandoned but late rains revived them and fair crops were harvested.

Although no official estimate of the current wheat crop has been made, private estimates place production around 150,000,000 bushels. Recent rains have improved crop prospects in many areas.

### Peace Gesture

Chancellor Hitler Receives New Soviet Ambassador At His Villa

Berlin.—Chancellor Hitler gave diplomats something to think about when he received the new Soviet ambassador at his Berchtesgaden villa, and in the course of the exchange of greetings used the word "non-intervention."

He observed creation of normal relations between Germany and Russia would correspond not only to the interests of both countries but also to the requirements of non-intervention, "to-day more pressing than ever." He said Germany would aid co-operative efforts.

In some quarters that was interpreted as an important peace gesture toward a nation for which Hitler often has expressed a pronounced dislike and which has been in frequent disagreement with the reich in sessions of the international committee for non-intervention in Spain.

### First Threshing Operations

Douglas, Man.—First threshing operations reported in Manitoba came from Wallace Blair of this area, 175 miles southwest of Winnipeg. He reports a good quality with a good yield from a field of 80-day barley.

## Loyalist Forces In Spain Have Cut Into Rebel Lines

Madrid.—Continued insurgent bombardment of Madrid was offset by reports government forces had cut a hole in the siege lines west of the former government capital and had destroyed at least 12 enemy war planes.

A defiance communique stated some of the insurgent divisions participating in the battle west of Madrid had lost half their men.

Six insurgent planes were destroyed at the Avila and Almorox bases by government raiders, it was said. Six others were reported burned when government pilots discovered another enemy base on the Alberche river.

Loyalist squadrons were credited with having attacked the railway stations at Calzaba, Oropeza and Merida.

Although at least 12 persons were killed under the long-range bombardment, Madridenos regarded the day's fortunes of war as balancing heavily in their favor.

Capitalizing on successes along the Peralba river, government troops opened the day with a slashing drive against Navalagamella, some 19 miles west-northwest of Madrid. In a few hours they reached the heights dominating the village. Sweeping down the wooded slopes, they forced the insurgents to retreat in disorder and soon were entrenched in buildings on the village's outskirts.

The successful drive had a double-barrelled effect. While carving out another slice of insurgent territory to add to the government salient, it forced Franco's commanders to send reinforcements to their left flank, thereby weakening their strength in the Brunete-Villanueva de la Canada sector.

Insurgent sources claimed in Navalagamella that Franco's troops were in almost complete possession of Brunete, 15 miles west of Madrid, after fighting their way into its outskirts.

The government's grip on Navalagamella was considered of strategic importance. Four miles southwest of Valdemorillo, it had been defended by barbed wire-guarded insurgent trenches. The insurgents also had turned two windmills into miniature fortresses, but they were destroyed by the effective marksmanship of government aviators and artillerymen.

London.—Well-informed sources reported foreign office experts have advised the government to ask members of the 27-nation "hands off Spain" committee to write replies

within three days, accepting or rejecting each point of Foreign Secretary Eden's compromise proposal for ending the non-intervention deadlock.

Decision as to whether to send out the proposed questionnaire was expected after the views of the French government have been learned.

The object of this procedure would be to lead the interested powers to make unequivocal statements on the basic problems of non-intervention, particularly whether foreign volunteers should be withdrawn from Spain before belligerency rights are granted combatants.

### Peace Propaganda

Would Have Government Portfolios To Promote Better Relations

Ottawa.—F. Trafford Taylor, of Winnipeg, pres. of Kiwanis International, suggested both Canada and the United States should have a portfolio of government for promotion of better relations, the head of which would be minister for peace propaganda.

"Canada can contribute something important to the peace of the world by keeping her policy closely in line with the United States," he told the local Kiwanis club in an address. "Through our example the world may find a peace."

Declaring his opposition to the separatist movement by French Canada, Gerard Martineau, of Montreal, governor of the Maritimes, Ontario and Quebec districts, also addressed the meeting.

### Oil Reserves

Says Discovery Of New Oil Fields In United States Is Needed

Moscow.—A Russian scientist told the international congress of geologists the discovery of 10 or 12 new oil fields annually would be necessary to maintain United States reserves against an annual national consumption of 1,000,000,000 barrels.

The vice-president of the Russian Academy of Science, Ivan Gubkin, declared annual new fields must be capable of producing 100,000,000 barrels a year each to keep future reserves intact.

He discounted the world's petroleum reserves, however, and estimated the total world reserve at 7,075,200,000 tons which, he said, would be sufficient for many years.

## Resignation Of Murray As Chairman Of Wheat Board Is Announced

Ottawa.—Policy of the Canadian wheat board will be continued for the coming crop season but under different direction. Resignation of Chairman J. R. Murray was accepted by the government and vice-chairman George McIvor appointed in his place. The vacancy on the board was filled by the appointment of its treasurer, Robert Findlay.

Trade Minister W. D. Euler announced the changes following a meeting of cabinet council. In carrying on the board's policy of last year the fixed price of 87½ cents a bushel will be maintained but no purchases will be made unless the price falls below 80 cents a bushel on basis of No. 1 northern at Fort William.

The wheat board will continue in operation, Mr. Euler said, pending receipt of the report of Turgeon royal commission on wheat marketing. The commission is now in England. When its recommendations have been considered, probably some time next winter, a permanent wheat policy will be adopted by the government.

Mr. Murray's resignation was not unexpected. He joined the board soon after the present government took office in October, 1935, replacing John I. McFarland, head of the board as originally constituted by the government of former Prime Minister R. B. Bennett.

In announcing Mr. Murray's resignation, Mr. Euler made the following statement:

"The resignation of J. R. Murray, chairman of the Canadian wheat board, was accepted reluctantly and with warm appreciation by the government of the valuable service ren-

dered by Mr. Murray. The latter had accepted the chairmanship on the assumption that he would be relieved of his duties when the large surplus of wheat was disposed of. That purpose has been accomplished, the carryover having been reduced to small proportions. It is being held against available seed and feed requirements."

In reorganizing the board to fill the vacancy created by Mr. Murray's resignation the salary of the chairman will be a saving, Mr. Euler said, since the appointment of Mr. McIvor and Mr. Findlay involve no change in their present salaries. It is understood Mr. Murray received \$20,000 a year.

No wheat was purchased by the board in the past year. Its price never having dropped to the level at which its powers became operative. When the board was formed originally there was a carryover of around 200,000,000 bushels, much of which had accumulated as a result of the efforts of the government to stabilize the market during the depression years.

Mr. Murray, who came to Ottawa to arrange his departure from direction of the wheat board, declared here he had no immediate plans for the future. He was formerly head of the Alberta Pacific Grain Company but is not now associated with that or any other company, he said.

Had accepted chairmanship of the wheat board on the understanding his work would be completed when the heavy ho'dover had been disposed of. The task had been accomplished and he had resigned. Further than that Mr. Murray would not comment. He left for Winnipeg.

### NOTES AND COMMENTS

**TIME MARCHES ON!** You realize that it marches very quickly as you grow older. Years pass, comparatively, as fast as months did when you were young; Most normal beings in their young manhood or young womanhood plan in various ways what they will do with their lives. Many of their ambitions are frustrated, some by their own lack of determination to follow through, others by force of circumstances over which they had little or no control. But the good sport in life, as in the lighter games, will take it on the chin and try and rise above circumstances, remembering that each day provides an opportunity to do something, even if only to make the world a little brighter and those around you a little happier.

**A MAN CAME** into the office and mentioned that he had lived here nearly thirty years ago. Men whom he knew then and who are still here he referred to. "I used to play football with Sam Moores, and he was 183 lbs. then, though I suppose he is heavier now. And Jack Rushton used to play, too." Then he started to reflect on their ages, and made one realize that the times he was referring to were almost thirty years ago, nearly half the allotted span of the average life. Doubtless the men he knew then have increased their waistlines, and do not move quite as briskly as when they fought their battles on the sports field. One thing is certain—that the 30 years have passed all too quickly for them and the rest of us. It is then that one realizes the fact that time does really march on, and at an alarming pace.

**AT THE OUTSET**, we state that we have no personal bad feelings against Mr. Aberhart, even though he may ignore the basic principles of good business practice. He has reverted to his promises of 1935, bringing them into the limelight by asking the banks to co-operate. Acknowledging that the government represents the people, by paying dividends it simply means the people must supply the wherewithal, no matter if it be goods or services. The bank's money is the people's money—yours and mine, if we have any there!

**HIS PROPOSALS** and the devices by which he would achieve his object all sublime, even outdo the revolutionary policies of the Communist party. If he has any other plan, he is more clever than the magician who produces a rabbit from a hat. The magician certainly has a rabbit to begin with, which is represented in Mr. Aberhart's grand scheme by that mythical thing he terms "cultural heritage."

**OUR VAST** natural resources are considered by him to be sufficient to produce dividends. These resources are only of value when capital and labor are employed to make them of practical use. Markets must be found for the products of our mines and forests, oil and minerals, to increase the purchasing power of Alberta people. Mr. Aberhart cannot produce purchasing power by juggling with other people's money, except he confiscates it. Having done that, what then? How much in dividends could he pay if he confiscated all the available money now in Alberta? The more one considers his plan, the more absurd it appears.

**AT THE Bible Institute** on Sunday he received grand applause by stating that the government has a right to know who holds Alberta bonds. How many of his audience hold bonds? Very few if any, if the truth were known. And those people who do hold them will include many who loaned the government their savings believing that their money was safe. Even the large corporations which may hold them represent the thrifty who managed to save their money when times were more opportune. What about the thousands of working people whose savings purchased life insurance policies? Quite a proportion of this money undoubtedly was invested in bonds, the Alberta government getting a share. The people who saved did so because they believed in self help, and did not want the hat to be passed to help them in old age or to pay their funeral expenses.

**THE MORE** one delves into Social Credit policies of the Aberhart brand, the more he comes to the conclusion that instead of helping the people, he is helping to lessen their morale and demoralize the whole financial structure on which credit is based. He censures the newspapers for calling attention to the bad condition of Alberta highways. He would have everyone, including himself, ostrich-like bury their heads in the dust and refuse to see that there is any. Automobile owners particularly have good reason to complain, and it is a mighty good thing for the people that there is a free press to expose the weaknesses of the band of preachers and teachers now making such a sorry mess of the government of this province.

### SPEAKING OF ROADS,

he stated he drove to a meeting and the road was so good that he had no difficulty in going at 50 miles per hour. One can imagine how much dust would be billowing up in his wake. Despite the fanatical support which he still receives, we know full well that the time must come when this Social Credit dream will fade out of the picture. A house built on sand cannot endure, and the people of Alberta will eventually realize that they have been led up a blind alley and all that will remain of the grand dream will be an unpleasant memory. In the meantime, we will be one of the class described by Mr. Aberhart as "knockers," for the false props of his philosophy have to be knocked from under his flimsy structure to put Alberta on the road to sane administration. Just recall the promises made in 1935. Keep them before you. Prosperity certificates! A factory every week! Every unemployed man to be put to work! \$25 a month! Dividends for all! Give me eighteen months!

### UNDOUBTEDLY Barnum

was right, and Aberhart knows it! He means to stay in office for three more years no matter what the cost may be to this province. And make no mistake, the insurgents all want that sessional indemnity of \$1800 per year, and more if the people will stand for it. Social Credit may be a nice soothing medicine to give to the people, but self-preservation is uppermost with the present government and members. That is demonstrated in forcible manner by the horde of political appointments made, from top jobs down to village justices of the peace and sellers of automobile licenses.

Mr. Aberhart regrets that certain sections of the Press of Canada "insult" visitors, (referring to Messrs Byrne and Powell.) No insults have been given. Were Mr. Aberhart, also his experts, to proclaim their policy in England, can one imagine the press there would not have something to say? The people of this province do not want spineless jellyfish newspapers echoing only the voice of the master.

More and more people are being guided in their shopping by the store ads.

## Local News

Mr. and Mrs. T. B. Fairbairn of Victoria, B. C., are staying at the Empire hotel for a few days.

Mr. and Mrs. Ernest Hill spent part of their holidays at Couer d'Alene.

Mr. and Mrs. Gorrie of Roosevelt, B. C., are guests at the Grand Union, visiting Mr. Sam McDonald and W. Bell.

Mr. and Mrs. J. Richards, Mrs. Joyce and Mr. and Mrs. Howard Davies and family were weekend visitors at Waterton lakes.

Harry Wilton-Clark, manager of Mohawk Bituminous Mines, Ltd., is a Calgary business visitor this week.

Frank G. Graham, sr. is visiting his daughter, Mrs. Steve Machin, in Edmonton, having left on Monday.

Mr. and Mrs. J. O. C. McDonald visited their daughter, Mrs. W. Whittaker, and Mr. Whittaker, at Fernie this week.

Mr. and Mrs. Walter S. Purvis enjoyed two weeks holiday on a motor trip to Vancouver, stopping for a day or two at Couer d'Alene on the return trip.

The Misses Marion Gillespie and Cherry Smith, former Colemanites and now residents of Vancouver, send regards to all their Coleman friends.

Two children of Mr. and Mrs. Asbridge of Mercoal, will come to Coleman on the conclusion of midsummer holidays to attend high school.

Steve Fetzko, driver of the delivery truck for Spic and Span Cleaners, Fernie, is proud of his new half-ton Chevrolet, which is very spic and span.

West Coleman Co-Eds made a good showing at Waterton last week when they whipped the highly touted Lethbridge Whippers 23-12 in a ladies softball exhibition game.

Peter Smith, fireboss at McGillivray mine, is spending his two weeks holidays visiting a brother at Bowden, Alta., who last year went on the pilgrimage to Vimy Ridge.

Ian Smith, Ernie and George Houghton are spending a week on a farm at Cowley, "wrestling" with the horses, pigs, steers and anything and everything there is to be "wrestled."

The picnic organized by the Ladies Auxilliary of the Canadian Legion proved very successful, on July 18, at Crows Nest Lake. The ladies are to be congratulated on the success of the day.

A renewal subscription received this week was from Mrs. Montague Wilson, former Coleman resident, and Mr. Wilson, who was widely known throughout southern Alberta, having travelled for a Calgary firm. Old friends will be pleased to hear of them.

Mr. and Mrs. McIntyre left this week for their annual vacation in various parts of the western states. A week previously they started, but were called back from Spokane, owing to one of their children having to undergo an emergency operation.

Mr. J. C. Cullen, of The Canadian Bank of Commerce, has received advice of his transfer to Moncton, N.B., which will take effect next week. He has been ten years in the bank's service in western Canada, and his home is in Charlottetown, P.E.I. He came to Coleman in March, 1936, and made many friends during his term here.

Bob Davies and Bill Griffiths, former Colemanites and now residents of Vancouver, have become keen gardeners since residing at the coast city; and, states Ernie Hill, they will be only too glad to send some of their prize flower seeds to any of their Coleman friends who may desire them.

## A GENTLE HINT!

Now that part of Second street has been surfaced, people living there are encouraged to take more pride in their surroundings with the abatement of the dust nuisance. It is suggested that those leaving ashes in receptacles to be carted away take care that they do not allow them to become over-filled, or if there are any loose ashes left after the man has called, to see that they are placed in the receptacle. It helps to make a clean town, and ashes and rubbish are particularly conspicuous if left lying bordering the highway.

## Death of Joseph D. Moir

Death came on Saturday last at 4 a.m. to Joseph D. Moir, father of Mrs. H. T. Halliwell, at the home of his son at Constance, Sask. He was 82 years old. He was born on Sept. 24, 1855, in Lance Aux Beaulieu, P.Q., the fourth son of Robert Moir, formerly of Kilmarnock parish, Doune, Perthshire, Scotland, and Margaret Dawes, of Montreal.

The old folks moved their family to Western Ontario, settling in Chatham district, where Mr. Moir was married to Ida Adelia Turner, of Prince Edward County, on June 24, 1885. She died in 1931 and is buried at Constance.

Members of the family living are Percy, Tom and Malcolm, sons, all living at or near Constance; and Mrs. C.B. Junk of Osbow, Sask.; Mrs. S. H. Davies of Little Woody, Sask.; Mrs. H. T. Halliwell, Coleman, and Mrs. Fletcher, of Peace River Block, B. C. Other relatives live at Windsor and Chatham, Ont.

Mr. Moir visited Coleman on various occasions during the past number of years, and was always pleased to spend a month or two in the mountains.

## SNAKES ALIVE!

That's what we saw this week, and it wasn't from drinking spirituous liquor. Three young publicity hounds brought in a few young snakes they had found and thought we would be interested. Naturally they'll be looking for their names in the paper. They are Douglas Wilson, Johnny Hopkins and John Dryden.

When boys at their tender age get their names in the paper, they will imagine they have planted their feet on the first rung of the ladder to fame and fortune.

## Well-Known Couple Married

The marriage of William Fraser, well-known local hockey player, and Eunice, second daughter of Mr. and Mrs. H. A. Shayler, of Crows Nest, B. C., was solemnized on July 24, at the manse of St. Paul's church. Rev. H. J. Bevan officiating. Attending the bridal couple were Mr. and Mrs. Frank Vejpreva, the latter being a sister of the bridegroom. Good wishes of a host of young people will be extended to the newly-weds, who have taken up their residence in a comfortable home in Grafton town recently purchased by the bridegroom.

## Kimberley Trims Coleman 4-1 in Soccer Game

Kimberley Dynamiters added another two points to their impressive total in the C. N. P. football league, when they trimmed Coleman 4-1 in a scheduled game at Kimberley on Sunday.

Lack of interest on the part of several players caused the local team to field a weakened eleven, and although they gave a good account of themselves there was no match for the strong Kimberley club and were well beaten.

Counter Check Books may now be obtained through The Journal office, quality books at lowest current prices. Keep this in mind when you are asked for orders by out-of-town customers, and place your order locally.

## Corbin Almost Deserted Village

Of Former Population of About 700, Very Few Remain Earning Precarious Living.

An example of how quickly labor troubles may contribute towards turning a lively industrial centre into a "ghost" town is seen at the once thriving mining town of Corbin.

Two years ago last April disension in labor ranks culminated in a riot, in which a number were wounded; strikers, police and workers. Agitators, including one Harvey Murphy, played their part all too well or too badly with the result that to-day all is quiet, and is likely to remain so for an indefinite time. After the riot, the mining company, having been operating under considerable difficulties, decided it was not worth continuing in the face of opposition from its own workers. Arrangements might have been made to carry on with a skeleton force, and thereby keep the mine in part operation. But apparently the company, having done all possible, felt—what's the use?

The town is connected with the main line by a branch line of railroad of 18 miles, and a good automobile road. The rails are rusty, though the auto road is in fair shape, over which visitors or people out for a pleasure drive find easy passage. At Corbin about 15 children have been attending school, under Miss Timeaus, but it is not known if there will be sufficient remain after mid-summer to continue the school.

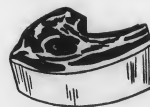

The dairyman who did a thriving business when the mine was operating, now delivers about a dozen quarts from the one or two remaining cows of his once large herd. He delivers it on foot, to save his horse, which he uses to skid out logs for mine props to be shipped to mines in this district. Mr. Gibson and Mr. Montalbetti are retained on the company payroll to safe-guard the property, maintaining a continuous vigil, in turns of twelve hours each.

The railroad that once served the town and hauled out coal, known as the Eastern British Columbia Railroad, has been given permission by the Railway Commission to remain closed for five years from the time the mine closed down. Four locomotives lie mute and sombre-looking in the roundhouse.

The hotel, boarding house, dwelling houses, with no sign of life, cast a spell of loneliness, and cause one to think of what might have been. There is still a cafe operated by a Chinaman with quite a brood of little children, but it is difficult to see how he can eke out a living.

Mr. Montalbetti is optimistic that a turn in the tide will come when coal will be in demand, and that the mine may operate again. It was started in 1908, and he has been there since. At one time he lived in Frank and has a brother Isadore living in Coleman.

Good printed matter is essential in any business.

## WORLD HAPPENINGS BRIEFLY TOLD

President Roosevelt signed legislation authorizing the United States war department to start work on a \$105,000,000 flood control program.

Sir Samuel Hoare, first lord of the admiralty, stated that two of the three new battleships of the 1937 program would bear the names of Jellicoe and Beatty.

The Manitoba government will increase its direct relief grant to Winnipeg as a temporary expedient, Premier John Bracken announced in a statement.

France's air force will be doubled by the spring of 1939, Air Minister Pierre Cot declared at Bouguenais, inaugurating the first nationalized aeroplane factory.

John Macneil, poet laureate, was elected president of the Society of Authors. He succeeded the late Sir James Barris, who held the post from 1928 until his death June 19.

Two twopenny half-penny George V. jubilee stamps of the prussian blue color the King disliked and requested reprinted in lighter blue, sold for \$250 and \$250 respectively.

Lieut. G. E. Matchett, of Hamilton, Ont., was awarded the trophy for the all-comers' grand aggregate at the Bielec coronation rifle competitions. It was his third win for the Canadian team.

After trying for hours to burn open the door of the safe in a Toronto office, cracksmen gave up. Next day police said the safe, in which there was \$150 in cash, was not locked.

Bound for far-away Ellesmere island and a year of scientific investigation in the north country, Clifford MacGregor, Newark airport meteorologist, and his associates sailed out of Sydney harbor in their schooner, the A. W. Greeley.

### Grass Diet For Anaemia

#### Health-Giving Vitamins Build Up Red Blood Cells

Men and women, boys and girls are commencing to eat green grass, which, until recently, was considered only cow feed and not very good at that, at certain stages of growth. But, out before it commences to joint, grass, which includes oats, wheat, rye, Sudan and barley, is exceedingly high in health-giving vitamins, and contains fifteen or more minerals which enter into the development of the body. Professor W. R. Graham, of the Poultry Department, Ontario Agricultural College, Guelph, claims that the ingredients of the tender fresh grass, among other things, build up the red blood cells and patients suffering from anaemia respond to the grass diet. It is understood that several tons of grass, dehydrated to preserve it for use the year round, are available for the Sick Children's Hospital in Toronto.

It is the leaf that is so valuable, thus the importance of cutting before the stem forms, then dehydrating it and placing in cold storage or mixing it with butterfat so as to retain all the sunshine it has absorbed, all the protein, minerals, vitamins and that growth substance known as carotene. A combination of lawn mower, vacuum, dehydrator for cutting, picking up the grass and drying it in one operation was recently patented in an English magazine.

By a succession of planting of oats, rye and wheat, along with other grasses, we may have our grass fresh from the lawn or field ourselves.

### Planning Another Book

#### Lord Tweedsmuir Will Gather Material During Long Trip

Lord Tweedsmuir is planning to write a novel on Canada's northland when his term as Governor-General expires. The book will be published as the production of John Buchan, the family name under which he achieved fame in the literary world. When His Excellency left Ottawa, he carried colorful sketches of more than 100 "old timers" he expects to meet at different settlements in his journey to and from the Arctic circle.

### Way To Identify Criminals

#### Note Woman's Right Ear And Slant Man Wears Hat

The right ear of a woman and the slant at which a man wears his hat are factors which may serve to identify criminals, Ontario police chiefs were told at their convention in London. Lieut.-Col. S. T. W. of the Royal Canadian Mounted Police, Ottawa, said that in photographing a woman, care should be taken that the right ear was fully exposed.

An Edinburgh thief stole some lead—then sold it back to its owner.

### Wonders Of Plastic Surgery

#### Doctors Have Constructed Eye Socket Where None Existed

Born with only one eye and with only a few traces of eyelash where the other eyelids should have been, a 3-year-old New York girl will soon undergo an operation at the Manhattan Eye, Ear and Throat Hospital to equip her with an artificial eye. With the object of eventually appearing as normal as possible the child already has had two operations there.

It is considered a rather unusual case, although many plastic surgery reconstructions of eye sockets have been carried out with varying degrees of success. These operations usually have involved persons injured in accident or in battle.

Eighteen months ago the same surgeon who will do the next operation broke the "seal" of the closed eyelids. In his second operation, about a year ago, he transplanted some of his own membrane from inside the little girl's cheek to the eyelid socket to make a "pocket" to hold the new eye. He also constructed upper and lower eyelids out of the skin where the regular eyelids should have been.

The third operation will include grafting another tissue flap from some other part of the child's body to improve the lids and deepen the eyelid "pocket." The surgeon expressed optimism concerning the chances of materially improving the child's appearance. Eyelashes will be made, he said, probably from the girl's eyebrows.

The actual insertion of the artificial eye will not take place for some time after the operation, to give the tissues a chance to heal.

### One Way To Peace

#### Is For People To Understand Other Fellow's Viewpoint

"Me and 'Im," the article by the Rev. W. H. Elliott, has brought the following commotion from G. T. Woodland of Thos. Cook and Son, Ltd., the famous travel agency: "The whole of our experience bears out the truth of 'Me and 'Im,' so forcefully put by the Rev. W. H. Elliott."

"We are constantly sending parties of tourists to many parts of Europe and even further afield, and they one and all return with a warm corner in their hearts for the people of the countries they have visited."

"Moreover, I am sure that our people, mixing with inhabitants of foreign lands as freely as they wish, have left behind a good impression of the people of these islands."

"The opportunities for this mixing vary somewhat according to the nature of the tour. Some tourists travel independently, others go with conducted tours, using the ordinary railway facilities of the country, and very popular are those grand tours where the traveller has a reserved seat in a special train throughout."

"In all cases there is plenty of free time to see something of the ordinary, everyday-life of the people. 'A friendly smile and a kindly word soon open the way to a little entente, and in surprisingly few cases are there any language difficulties.'"

"They soon get down to the terms of 'me and 'im,' and without doubt that is all to the good in the cause of peace."

### New Mining Discovery

#### Find Nickel, Platinum And Gold In H.R. Area

A new mining development is under way at Ranken inlet, on the west coast of Hudson Bay, 240 miles north of Churchill, Man., the Winnipeg Free Press stated in a newspaper story. Minerals discovered include nickel, platinum, gold and copper.

Should tests already made be substantiated by further exploration work, an expenditure of from \$40,000,000 to \$50,000,000 may be undertaken, the paper said.

Several months ago, drilling equipment was flown in from Churchill, New York mining and financial interests are reported behind the development scheme.

### For New Speed Record

Captain G. E. T. Eyston, British racing motorist, will attempt a new world speed record in September on the Salt Lake beds of Utah. The car will be his own design with side-by-side engines and enclosed wheels. Sir Malcolm Campbell holds the record with a speed of 301.12 miles an hour, also attained on the salt beds in the United States.

The new cafeteria of the Interior building in Washington is equipped with 12,120 pieces of silver, 26,100 pieces of china, and will use 6,000 paper napkins daily.

The island of Guernsey, famous for the world over for its dairy cattle, contains 24 square miles. 2213

### CLIMBER FALLS DOWN MOUNTAINSIDE

Serious head injuries and a broken leg were suffered by Joseph Halfax, daring mountain climber, shown inset after his rescue, when he fell 60 feet down the side of a mountain near Seattle and landed on a rocky ledge.

### Heavy Fighting Plane

#### U.S. Has New Plane Said To Be Most Effective In World

"The United States army is ready to send into the air what it terms the most formidable fighting plane in the world—a monoplane for combat in the sub-stratosphere."

The new five-seater fighter, being prepared for test flights at Buffalo, N.Y., is a radical departure from previous military designs.

The all-metal, armored plane is a twin-motored "pusher" (with propellers behind the wings), carries six machine guns and light bombs, and has new devices to increase its speed and fighting power.

The war department said the plane had been designed to cope with the "giant bombing planes of the flying fortress type now flying in the leading nations of the world." The department said: "An essential quality in an air destroyer is the ability to strike with power when it has engaged its prey. This plane answers with six guns, more powerful armament than ever before carried on a fighter."

MAKE THIS MODEL AT HOME—SHIRTSTOCK'S BECOMING TO EVERY TYPE

By Anne Adams

"Way in the fashion lead for mid-Summer and Autumn, this striking Anne Adams shirtwaister is due for a busy season of home, school, and office wear! Imagine how chic you'll look in a crisp v-neck, grey seersucker, striped shirtwaister, novelty cotton, synthetic, or silk. You'll be flattered by that youthful Pan collar, button-front bodice, patch pocket, and antique pleated skirt. Too, you'll love the saucy, ruffled hem and belt to delight your heart. So easy to make, its Pattern 4459, that you'll want to make several versions. Pattern 4459 is available in misses' and women's sizes 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, and 32. Size 16 takes 3 1/2 yards 36 inch fabric and 1/2 yard 2 inch ribbon tie. Illustrated step-by-step sewing instructions included."

Send twenty cents (20c) in coin or stamps (coin preferred) for this Anne Adams pattern. Write for Size, Name, Address and Style Number, and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 375 McDermott Ave. E., Winnipeg.

### SUNDAY SCHOOL LESSON

AUGUST 1

#### GOD LEADS A PEOPLE

Golden text: The Lord will guide thee continually. Isaiah 58:11. Lesson: Exodus 13:17-15:21. Devotional Reading: Psalm 37:1-7.

#### Explanations And Comments

From Egypt to the Red Sea, Exodus 13:17-14:2. Now when the Pharaoh let the people go, God did not lead them along the road to the land of the Philistines, although that lay close at hand, for God thought that perhaps the people might have regrets and return to Egypt, if they had to fight their way; so God led the people by a roundabout road in the direction of the desert, toward the Red Sea. The Israelites left Egypt in an orderly array. (Moffatt's translation).

Moses told the bones of Joseph with them; you remember Joseph had directed that this be done. What greater proof than the presence with them of the mummy of Joseph in its sarcophagus could the people have had of their leader's faith in their eventual salvation?

And Jehovah went before them by day in a pillar of cloud, to lead them the way, and by night in a pillar of fire, to give them light. Cloud and fire were symbols of His presence with them.

The Pursuit of Pharaoh's Forces, Exodus 14:3-9. When the Israelites were going, the revision of feeling came over the Egyptians. "What is this that we have done that we have let Israel go from our midst?" they questioned. And Pharaoh (his representative) started off in hot pursuit, leading with him "six hundred chosen chariots, and all the chariots of Egypt, and captains over all of them, and his army." The Israelites could easily be overtaken and captured, the pursuers thought, for were they not "entangled in the land, shut in by the wilderness?"

The Crossing of the Red Sea and the Destruction of the Egyptian Host, Exodus 14:10-15. Moses had kept a brave front before the people, and had assured them of God's help. Then Israelites felt the need of fresh assurance of God's presence with them, and he besought God in verse 15. "I beseech thee, O Lord, as thou hast said, 'Wherefore criest thou unto me?' Speak unto the children of Israel, that they go forward."

It was not petition, but petition. The children of Israel crossed over on dry ground, but when the Egyptians pursued, the waters returned and overwhelmed them.

Thus Jehovah saved Israel that day out of the Egyptians; and Israel saw the Egyptians dead upon the seashore. And Israel saw the chariots of the Egyptians dead upon the Egyptians, and the people feared Jehovah; and they believed in Jehovah, and in his servant Moses.

### Letters To The Editor

Correspondent In U.S. Has Sent 78,000 Missives

A certain Mr. Charles Hooper, of Cour D'Alene, Ida., has created a peculiar record. He is the world's champion writer of letters to the editor. To date he has written 78,000 missives, and these have been sent, not only to editors in the United States, but also to France, Germany, Italy and Spain. All letters are written in the language of the province in which they are printed.

It is easy to incur the criticism of being a busybody merely by writing to editors, but Mr. Hooper doesn't care. He knows why newspapers desire columns to letters—the reason being that people like an open forum for discussion—and he has decided to make use of them. It is better than airing one's views around a stove. We take off our hats to Mr. Hooper. —Hamilton Spectator.

### Makes Holiday Enjoyable

#### British Premier Gets Expenses For Week-Ends At Chequers

The question of holidays with pay may worry some people but never Mr. Neville Chamberlain, who, as Prime Minister, finds himself in the odd position of getting extra pay when he goes to Chequers for the week-end. According to the Chequers Estate Act of 1917 the Prime Minister receives a special expense fee of £15 for every week-end he spends at his official country house. That means that he can add £750 to his income by the simple process of going to Chequers every week. —Glasgow Bulletin.

### Court Has Man Puzzled

#### Fined Him For Blowing And Not Blowing His Horn

Walter D. Murphy of Boston, is puzzled.

District Court Judge John Duff fined him \$1 for blowing his horn unnecessarily and disturbing people—and then levied a fine of \$2 against him for not blowing his horn.

The Judge told Walter motorists must learn to use good judgment. Murphy, the Judge said, decided there was an emergency "and began sounding your horn after the emergency was over."

In Switzerland, melting glaciers form the chief means of water power which furnishes the country with electricity.

### ARTICLE No. 8

#### CAUSE OF CANCER

No definite cause of cancer is known. There are some predisposing causes of the affection. One of these predisposing causes is age. Only ten per cent. of all cancers occur under the age of 35. Ninety per cent. of all cases of malignant disease is found in persons who have passed the age of 35. The latter period is called the "cancer age". The reason for this is unknown. It probably rests in the tendency for control of cells being less effective in persons of middle life. Another predisposing cause of high importance in respect to cancer is that a great variety of irritants may, in a person predisposed to cancer, stir up a cancerous growth.

Among the common irritants which cause the growth of cancer are: tar, asbestos, which is a form of tar, certain lubricating oils, tobacco smoke or the juice of tobacco, another tar; chemicals such as arsenic, the effect of strong sunlight, strong winds and dust; of a jagged tooth in the mouth, dirty teeth, ill-fitting dentures, burns from any cause, too hot foods, and almost any conceivable form of irritation long-continued. Temporary irritation has little effect in the production of cancer; the cause of irritation must be long-continued.

Hereditary transmission and race are not believed to be provocative of cancer. Cancer is not hereditary like diabetes and pernicious anaemia, but undoubtedly some persons are more predisposed to cancer than others.

Because a person's parents or close relatives have had cancer, does not mean that the individual will have it. Nor is cancer caused by a germ such as is the cause of one contagious disease or another. Cancer is neither contagious nor infectious. Nurses and doctors, constantly in contact with cancer patients, do not contract the disease from them. There are no such things as cancer houses. There are instances in which cancer has resulted from the effect of a parasite. But it is the irritation produced by the parasite that causes the cancer to arise. Cancer is not in the family.

While articles of food do not cause cancer there may be something to be said about the manner in which one eats one's food. Food that is imperfectly chewed, taken too rapidly, washed down without proper mixing with the saliva, may act as an irritant to the digestive tract, thus provoke cancer. The great frequency of stomach cancer—one-third of all cancers in man—seems to indicate that the way food is used, may have something to do with the cause of stomach cancer.

Article No. 4 will be "How Does Cancer Spread?"

### Advantage Of Camping

#### Life In The Open Teaches Children To Be Unselfish

Life in the open teaches these youngsters self-reliance. It develops initiative and adds to the joy of living—particularly when there is little interference—beyond the necessary supervision—from grown-ups.

But perhaps the greatest advantage is the spirit of unselfishness which camping develops. Pleasure comes from what one does for others, not in what fellow campers do for you, and every camper is likely to learn this the first day out in camp. It is in camp that a boy or girl learns better than anywhere else perhaps the art of how to "fit in." And above all, how to make friends. There lies the answer to successful camping—the ability to get along with one's companions. The sooner this lesson is learned the smoother will be the pathway through life.—Calgary Herald.

### Appointed To Manitoba Post

Prof. H. C. Etter, graduate of Columbia University, New York, and University of British Columbia, was named superintendent of education for Manitoba. He will undertake new duties created by 1937 Manitoba legislation which provided for re-organization of the department of education.

Spain has 50,000 gypsies within her boundaries.

# THE YELLOW BRIAR

A Story of the Irish on the Canadian Countryside  
By PATRICK SLATER  
By arrangement with Thomas Allen, Publisher, Toronto.

CHAPTER VIII.—Continued

Mrs. Marshall brought out Bob's pan of porridge. The dog wagged his long, lipped brush; but stood back, acting nervous and strangely distrustful. He had no intention of being tied up again.

"Well, Bob, you scoundrel, be off after the cows," said Marshall, as he stepped into the house for his breakfast.

The dog whined once or twice in a fretful, bothered sort of way; and then trotted off round the front of the house.

Late that afternoon he was seen again, standing out in the lane. His coat was matted; and he had the hungry, furtive look of a strange, tramp dog.

The Marshalls talked about him at the supper table.

"You know, Nancy," Mr. Marshall remarked in his quiet, hesitating sort of way, "the Brechons are talking about dogs worrying their sheep. I saw another dog around here the other day," and the man paused at the ugly thought—"you don't think the two of them might be...?" I saw some suspicious stains on his..."

"Oh no," Mrs. Marshall objected, "indeed not Bob would not be doing the like of that."

It became apparent that evening that the collie was laboring under distress of some kind. He was whining and whimpering, and running up and down the lane. Yet he snarled if anyone approached him. "That dog has gone clean out of his head," said Mrs. Marshall. "Not a chain him up, Wilma."

"Just catch him for me and I'll tell her husband told her; and he swung himself into the saddle on old Gunpowder to ride back to find out what the dickens was keeping Paddy and the milk cows."

That was all too much for the worried dog. As Marshall turned the old mare's head toward the bush, Bob's shoulder hair bristled. His long, slim snout went up in the air; and he gave the long drawn, high-pitched cry the hills of Monro had heard before. It was the wild, weird howl of a wolfdog calling his mate. Then Bob wheeled and ran toward the road.

"I think, Nancy, the dog wants me," said Marshall, "I'll be back for the milking."

And William Marshall trotted the old mare down the lane after the excited dog. It was the time the wild pigeons were uniting their flocks for the migration south. In the forest that nestled within the arms of the Great Lakes, the wild grapes were ripe; and beechnuts littered the ground. Dense clouds of the plump, feathered, fluttering birds hung over the river, and swung low down over the river in a wild, reckless, whirling mass of life.

With every evidence of relief, Bob waited for the horseman at the lane gate; and the two of them trotted down the road together. Quite a ways down, a rough corduroy bridge crossed the trout creek; and just beyond that point the dog turned aside from the roadway and followed a snake rail fence that climbed up through a heavy wooded knoll. Marshall threw the reins over the horse's head and followed the dog. It was the late afternoon of a beautiful autumnal day. The squirrels in the grove of old beech trees were chiding Bob for disturbing their industry among the beech and hickory nuts.

Marshall found the dog pulling and whining at some object that lay hidden behind a mound of dead decaying log had made. For yards around, the dog's head had padded down the black mould and rocks, and it flat and firm as a beaten path.

No cows were milked at the Marshall farm that night. Yes, Bobbie had found his lad, but he had found him sleeping in a twilight that does not rise or set.

Edwards had pushed on quickly with the stolen money by way of Hamilton; and he was arrested at the border. In those days, all the desperate man needed was an extra

day or two to carry him 50 miles south to practical safety. It was another crime committed on the impulse of the moment. Charlie had seen a fat, black squirrel on the snake fence; and, grabbing one of the guns, had run over to take a shot at him. With the other gun, Edwards had followed for the fun of the thing. And there being no one by, the devil tempted the wretched man to shoot the squirrel. As Charlie knelt to take aim, the man shot the boy's brains out.

It was indeed a terrible tragedy to the whole countryside; and neighbors and relations from far and near poured in to sympathize with the poor mother and family. I went around with William Marshall arranging to get the grave dug, and things like that. No one seemed to pay much attention to the father; but, between men, grief is all ways inarticulate. But he was the one I was sorry for. After the affair was all over, I found him one day sitting alone out in the barn; and the tears were coursing down his rough and haggard face. In a sort of an apologetic way, he took my hand in his, and the two of us lay down in the straw together. We had a fine cry, and it did us both a lot of good. The truth is William Marshall's heart was broken. The miserable man, Edwards, had destroyed two lives, that of the only son and that of his wife.

It was a happening of the long ago; and a simple old man cannot make the moonbeams playing on the waters of fancy to give with convincing detail an account of a senseless and wanton tragedy that caused many a Monro mind to doubt for the moment that the Methodist God was in his heavens and attending to his business.

In his funeral sermon, Rev. Mr. Clarke got over this difficulty by taking for his text the resolute cry of a brilliant old man who was sorely afflicted: "Though I slay me, yet will I trust in Him; nevertheless I will maintain my own ways before Him."—Job XIII:15. That text—and particularly the latter part of it—always seemed to me to express the true essence of Methodism: be a saint, and don't let the devil get you. The Reverend C. M. Clarke was an ambitious preacher, but the stationing committee never gave him another preaching circuit. At the age of 28, black diphtheria promoted him from the hills of Monro to the way of all flesh.

Oh! yes! they hanged Edwards; and it was an atrocious job; the law made out of its part of the killing at that occasion. The hangman had much to do with the rope; and in the drop, a loose twist caught under the felon's arm. Edwards' body dangled there until the hangman shined down the rope and loosened the hitch to let the noose get a proper chuckle on the neck. The law left him hanging only lengthened out the tragedy and added to the weight of it.

A grain of dust will spoil the working of the finest watch a craftsman ever made. And why not, yet, on a sudden impulse, the human brain sometimes also goes out of order? It is nothing short of the pitying mercy of God that stays the horrifying impulses that surge, one time or another, through the brain of every saint and sinner. He is a brave man who frankly examines his own naked soul. "Ample space and verge," he'll find there, "the characters of hell to trace." Oh, yes! what shows above the surface may be as bright as a gleaming iceberg in the sun of general approbation; but three-quarters of the mass lies below in dark, surging, treacherous waters. And man kills the things he loves in diverse ways other than by the shedding of blood. In the pale moonlight, the soul of every man swings in clanking chains on a gallow's tree.

I confess to Almighty God, to blessed Mary, ever Virgin, to blessed Michael the Archangel, to blessed John the Baptist, to the holy Apostles Peter and Paul, and to all the Saints, that I have sinned exceedingly in thought, word, and deed, through my fault, through my fault, through my most grievous fault. Therefore I beseech blessed Mary, ever Virgin, blessed Michael the Archangel, blessed John the Baptist, the holy apostles, Peter and Paul, and all the Saints, to pray to the Lord our God for me.

May the Almighty God have mercy on me, forgive me my sins, and bring me to everlasting life. Amen.

May the Almighty and merciful Lord grant me pardon, absolution, and remission of all my sins. Amen.

## CHAPTER IX.

The seasons press upon the farmer, each with its special throng of work, and do not loiter to give simple country hearts the time to grieve. The winter set in abruptly in the fall of '64; and for hours, early in the mornings the snow fell in drift, drifting flakes to block the roads in the hills of Monro and add greatly to

the winter labor of teaming the grain out to market. The crop on the Marshall farm that season had yielded 1,500 bushels of fall wheat of high milling quality; and, as a result of the cold conditions, this grain was hauled down the 6th line and stored till the spring in Isaac Chafee's warehouse at Tullamore.

On a farm, in those days, it was usually the lone himself who hauled his grain to market. The rest of us made a higgledy-piggledy job of it, cleaning and sacking the wheat that another load might be ready by the time his returning sleighs tinkled up the lane. In the cold, blue, starry glare before the dawn on a snowy night, Mr. Marshall would bundle himself up in fur coat and blankets, and again head a fresh team on the sixteenth mile hug. I assisted matters by taking a part of his load over the hilly north end of the road where the going was specially heavy; and, for the purpose of this three-mile lift, it was necessary, of course, to bestir the tired, sleeping team of yesterday out of their comfortable dreams of mountains of hay and oats and of pleasant valleys where the sweet and tender blue grass grows. Owing to my trip being a short one, I was careless about wrapping myself up snugly, and I often came back stiff and half frozen.

## Religion And Health

Right Living Tends To Result In A Sound Body

Paul, Spinoza, Emerson and Robert Louis Stevenson as examples who greatly achieved in spite of ill-health are cited by Dr. Rev. Peter Bryce, D.D., Moderator for the United Church of Canada, in "Health," the magazine of the Health League of Canada. Dr. Bryce also mentions Kagawa, "the amazing evangelist of the slums of Japan, who ignores his disease and works incessantly."

But for the multitude there is a connection between health and religion, according to this eminent churchman. "Health," he says, "is often the necessary preliminary to religious living," and he gives examples to prove the argument.

Conversely, he points out that a religious life means for health. "Many of the modern diseases," writes Dr. Bryce, "are traceable to vicious living that is utterly irreligious. The plagues of history were in many cases due to wickedness and sinfulness. There is an increasing intelligence that is perceiving the connection between a life that obeys the laws of God and consequent health of body and mind. The Christian religion seeks wholeness in the lives of men. It does not call one part of the life away from another.

"The Christians in Thessalonica received a letter from Paul in which he had written 'May God Himself who gives peace make you entirely holy; and may your spirit and body be preserved complete and be found blameless.' That is the aim of the Christian faith—holiness, healthfulness, wholeness of the life. The Great Physician healed the sick and the healed ones became His followers. He taught the way of wholeness of life and the learners of the way went out to do heroic things, strong in body, strong in courage and patience, and achievers of great things for the world's good. The religion of Jesus Christ makes for the health of those who live it."

## Weighing The Earth

New Type Of Pendulum Used By American Scientist

An American scientist has now invented a new type of pendulum for calculating the weight of the earth, and his latest figure puts the weight at 6,576,000,000,000,000,000 tons. The pendulum consists of four small balls of platinum fixed on the corners of a square and mounted on a frame so that they can rotate. Mounted outside are two larger balls, also made of platinum, and when the frame is spinning it gives index figures from which the earth's weight can be calculated.

So delicate is the apparatus that it is upset if anyone walks around the laboratory in which it is housed. It can only be used late at night when street traffic vibration is at a minimum.—Pearson's Weekly.

## Knows What It Means

Mrs. Franklin D. Roosevelt knows what it means to be at a loss for words. The words were lost—literally. A whole sheet of her radio script was missing when the president's wife, who was broadcasting, turned what it meant to be at a loss for words. The words were lost—literally. A whole sheet of her radio script was missing when the president's wife, who was broadcasting, turned

The Big Tree of California—Sequoia gigantes—largest of living trees, produces cones two to three inches in length, each carrying about 200 seeds.

## Romance Of The North

Canada's Governor-General Takes Mackenzie River Trip To The Arctic

There is an element of romance in all great rivers. Rivers beckon to be away; to float placidly into new climates; to taste the adventures of the unknown. It was the lure of the great St. Lawrence which led the early explorers of the French regime into the heart of Canada. It was the promise of the Nelson which opened a way for the Selkirk settlers more than a century ago into the center of the continent. By the Pacific sea the broad mouth of the Fraser opened a brief highway into the gates of the Rockies. And, in the far north, the Mackenzie, most placid and most majestic of them all, has held for ages the secrets of the silent land through which it flows.

Perhaps it is something of this romance of big rivers which has induced His Excellency Lord Tweedsmuir, Governor-General of Canada, a man associated with romance in his literary life as well as with administration and the problems of government, to select the Mackenzie River trip from Alberta to the Arctic as one of the outstanding events of his 1937 program. Leaving Edmonton His Excellency will travel by rail to the head of water navigation, where he will take boat at Waterways, Alberta, the terminus of the Northern Alberta Railways, and from that point the entire downstream trip of 1,600 miles will be made through the rich but little-developed valley of the Mackenzie and its tributaries. The return trip will be made by air in one of the Canadian Air Force machines, and if weather and other conditions permit the Governor-General will return from the direct route to visit the Great Bear Lake area, which in recent years has become famous as a source of radium, and in which mining operations for radium, silver and other by-products, are conducted on an extensive scale.

## Seeking Common Title

Movement Started To Address All Women As Madam

A movement to abolish the title of "Mrs." and "Miss" for women, on the grounds that it is an unfair distinction which has been started in London. The originator of the idea is Mrs. F. Petrick-Lawrence, wife of the Social-L.M.P. for West Leicestershire. She was a leader of the suffragette movement in its early days. The terms "Mrs." and "Miss" are unnecessary she feels because bachelor girls who scorn marriage for careers are no reason why they should advertise their single state when they are introduced to women clients. Similarly some married women object to being called "Mrs." on the grounds that it destroys their individuality. The proper way to address every woman over the age of 21, Mrs. Petrick feels, is by the title "Madam."

A strong supporter of her views is Miss A. M. Pierotti, assistant secretary of the National Union of Women Teachers. It would save a lot of trouble, she has stated in an interview, to require women could find some common title equivalent to Mr.

## To Replace The Daisy

Doctor Believes New Gadget Will Tell People's Thoughts

According to the Literary Digest, Dr. Phillips Thomas of Pittsburgh, research engineer, believes he has solved the problem of love. He has a new gadget which will replace daisies in the age-old "She loves me—she loves me not" pluckfest. "In the near future," he said, "we may be able to capture and interpret these radiations of personality and thoughts through electrical impulses. Every thought that flashes through the human mind or even the slightest mental or physical movement has a meaning, so far as its interpretation by electricity is concerned."

## A Gigantic Skull

Will Be Exhibited At New York World's Fair

One of the more gruesome but enlightening features of the New York World's Fair will be a gigantic model of a skull, large enough for exploration parties to walk through and gain knowledge of their intracranial anatomy. Visitors will be able to walk over the teeth and see just how they are embedded in the jaw. Another exhibit, being plotted by the other exhibitors, is a model of the human eye into which curious citizens may walk and produce pupillary contractions and expansions by yanking on levers.—Literary Digest.

As distinguished from the square inch, a circular inch is the area of a circle one inch in diameter.

Tarpon can swim at a speed of 80 miles an hour.

Extra values at no extra cost... that is your positive guarantee when you buy Firestone tires. Among these are Firestone's 2 Extra Cord Piles under the tread that bind the tread and body into an elastic inseparable unit making it safe at any speed. You pay nothing for this extra feature that gives you extra safety and extra mileage.

Get the most for your money. Firestone tires do not cost one cent more than ordinary tires. Have the nearest Firestone Dealer replace worn tires today. Specify Firestone tires as original equipment when buying a new car.

## LOW PRICED TIRES

No matter how little you can afford for tires go to the Firestone Dealer first. He has a genuine Firestone tire to suit every purse that will give you the safest lowest cost mileage.

## A Scheme That Worked

Meek-Looking Man Knew How To Handle British Colonel

A typical, peppery old colonel, home from India, decided to walk down to the local hostelry for a drink before going to bed. He called for a double whisky and joined the company in the saloon bar.

Before very long a meek-looking little man called to the landlady to have the empty glasses removed. "Take away the empties, George!" he called. "They're like the British Army."

This was too much for the soldier. Jumping up, he demanded an explanation and an immediate apology for this insult. Things looked bad for the little man.

However, with a smile the offender faced the colonel. "There was no insult, sir," he said calmly. "I said those empty glasses were like the British Army. So they are. They have done their duty and they're ready to do it again."

The colonel hastily paid for the next round.—The Legionary.

A new machine that holds broken arms and legs while plaster casts are being applied is asserted to insure more accurate setting of bones than possible with other methods.

Eagles use bits of green twigs to decorate the rims of their nest. When the color fades, fresh twigs are laid on.

## Little Helps For This Week

A new commandment I give unto you, that ye love one another. John 13:34.

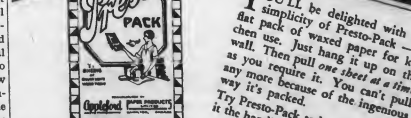

Let love through all my conduct shine like a star, though faint, of mine image fair, though faint, of Thine.

Let us let me His disciple prove. Who came to manifest Thy love. We should arrive at a fullness of love extending to the whole creation, a desire to impart, to pour out in full and copious streams the love and goodness we hear to all around us. Goodness and love mould the form into their own image, and cause the joy and beauty of love to shine forth. When this form of love is seen it appears ineffably beautiful, it delights the inmost life of the soul.

Not Just A Business

The Vermillion, South Dakota, Plain Talk says farming after all is not just a business where pork and butterfat and hay and potatoes are produced. It is a way of life; and a desirable way of life when advantage is taken of the opportunity to make the home attractive, pleasant and comfortable.

Stork makes all things difficult, but industry all easy; and he that riseth late must trot all day, and shall scarce overtake his business at night, said Benjamin Franklin.

ditional cost of book-keeping and mail-  
ing.

J. Harper, Remington Type-  
writers, Lethbridge, will be in  
town all day Friday. Leave word  
at Journal for repairs, etc.

## Medical Health Officer's Report Published By Authority of The Town Council in Interest of The Public Welfare

### REPORT OF MEDICAL HEALTH OFFICER

The following is published by au-  
thority of the Town Council of Cole-  
man:

Coleman, Alta., July 15, 1937.  
Mr. James Ford,  
Secretary, Coleman Board of Health,  
Coleman, Alberta.

Sir:

Re Sanitary Inspection.  
I am enclosing a report of a San-  
itary Inspection of the business sec-  
tion of Coleman at the first of July.

I would like again to recommend to  
the Board the passage of a by-law to  
abolish all privies on properties ad-  
jacent to the First Street of Coleman.

In considering this report, may I  
emphasize four recommendations  
which are of outstanding importance,  
viz:

1. Steffan's Bakery.
2. B. C. Cafe.
3. Grand Union Hotel drainage.
4. Privy—rear of Heibeln's shop.

Yours respectfully,  
R. P. BORDEN, M.H.O.

### SANITARY REPORT

July 15, 1937, Town of Coleman  
The Sanitary condition of the busi-  
ness section of the town and the de-  
tails and certain important recom-  
mendations arising from the inspec-  
tion are embodied in the following  
report.

#### Bakeries:

Hunter's Bakery was found well  
equipped, sanitary and cleanly kept.

Staffan's Bakery. This establish-  
ment was dirty through-out. The shel-  
ves beneath the counter found in a  
condition of filth. The kitchen was  
dirty and the mixing machine and  
tables were not properly cleaned. The  
yard at the back of the kitchen con-  
tained much litter and filth. The  
house was not properly kept and  
there is no dining room or eating  
utensils in evidence there. Dishes  
were seen on the kitchen work table  
and it is presumed that the family  
take their meals in a disorderly fash-  
ion on this table in the kitchen which  
should be used entirely for bake-shop  
purposes. It is recommended that  
this establishment be put in order or  
that a license be refused.

#### Restaurants:

Jimmie Evans: The restaurant  
part of this establishment was found  
neat and clean and in good order.  
The rooming house was in a state of gen-  
eral clean-up, painting and kalsomning.

Java Cafe: Equipment was suf-  
ficient; kitchens clean; food in good  
order. Generally well kept.

Coleman Cafe: This cafe was  
found in good order. Kitchen clean,  
and well kept. Refrigerator of am-  
ple size and clean. Food stuffs well  
protected.

Elite Confectionery: The building  
was not well kept and there was evi-  
dence of carelessness regarding the  
tools for dispensing ice cream.

The Pantry: The rooms were clean  
and the kitchen well kept. There is  
a straight pipe with no trap leading  
from the sink and this should be cor-  
rected. The garbage barrel at the  
rear, which also serves for the fat  
trap, was not properly covered. The  
kitchen which has been filled with  
a great deal of refuse and should be  
cleaned out and boarded in.

B.C. Cafe: The whole building is  
in a state of dilapidation. Its con-  
struction is a fire trap. The room  
on the second floor are dirty and the  
bedding in many instances filthy and  
not in proper condition for rental.  
The floor of the kitchen is old and  
soggy and giving away badly, and the  
walls are very dirty. The drainage  
from the kitchen sinks goes into an  
open trap on the east side of the  
building and the flow is not at all in  
the direction of the drain which leads  
towards the cesspool at the rear, but  
flows toward the main street front  
in undetermined channels under the  
building. The sinks on this side have  
completely given away. This build-  
ing should be condemned and the es-  
tablishment closed.

White Lunch: The equipment is  
good and the restaurant and kitchen  
were clean and in order. Store room  
was in confusion and a small cupboard  
which is used as a cooler in the winter  
months has been allowed to accumu-  
late rubbish and was in a dirty con-  
dition.

Palm Cafe: Was found to be fully  
equipped and clean.

#### Meat Shops and Groceries

Rushton's Grocery: Clean and in  
order.

Zak's: Hamburger shelf was dirty,  
and the small section where it is op-  
erated had much rubbish and unneces-  
sary dirt. Refrigerator was un-  
tidy. Store room walls and floor were  
dirty and the room was untidy.

Ledieu's: Shop was clean; meat  
house and blocks in order. Basement  
filled with a great deal of rubbish  
and dirt, and a general clean-up of  
this part should be ordered.

Allen's: Shop in good order.

Bertnick's: Shop in good order; re-  
frigerator clean; blocks clean.

Hoyle's: Shop and refrigerator  
well kept.

Scott's Fruit: Back yard contain-  
ed much rubbish and decaying vege-  
table matter. This was ordered to  
be moved at once.

Co-Operative: Shop was clean; re-  
frigerators in good order and meats  
well kept.

Laundry—Goody: The walls are dirty—  
should be cleaned and whitewash-  
ed. The drainage is broken from the  
tube to the sewer under the floor and  
should be required. The yard dis-  
used henhouse in a condition of filth  
and dirty outhouses should be re-  
moved.

There has been noticeable improve-  
ment in the establishment of several  
water closets, and the general con-  
dition of the privies is better than in  
former years. There is only one privy  
for the accommodation of the block  
occupied by Heibeln's barber shop,  
the tailor shop and two families oc-  
cupying the second floor. The out-  
house is of poor construction and the  
state of the pit is not sanitary. This  
situation should be corrected.

As there is as yet no fixed policy  
of the Board regarding sanitation in  
this section of town, it seems useless  
to report on properties individually  
and to confine our efforts to those  
which are outstanding and definitely  
in the classification of a public nu-  
isance.

There have been many complaints  
about the drainage from the Grand  
Union Hotel into the dried creek bot-  
tom. The odor at times is most dis-  
agreeable; the discharges, although  
presumably are not virulent, cause a  
breeding place for flies; the whole  
creating a public nuisance which  
should not be tolerated.

### Death of Jane Ellen Destobel

Jane Ellen, beloved wife of Al-  
fred Destobel, died in hospital  
on July 24, after a rather lengthy  
illness, suffering from goitre.

She was born in Dunmore,  
Pennsylvania, 37 years ago, and  
came to Fernie with her parents  
in 1901. They moved to Cole-  
man in 1904, and deceased at-  
tended school here. She was  
married in 1918 in Coleman, and  
children are Louis 19 years, Ray-  
mond 14 years, Irene 12 years,  
Elis 11 years.

Her mother is here from Na-  
naimo, B. C. Other relatives are  
Mrs. A. Fowler, Nanaimo; Am-  
brose Wheatcroft, Nanaimo; F.  
Wheatcroft, Blairmore; Mrs. H.  
McGillivray, Coleman; Lester  
Wheatcroft, Drumheller; Mrs. G.  
Luck, Drumheller; Mrs. E. Car-  
ter, Nelson.

The funeral service was held  
on Wednesday from Crows Nest  
Funeral Home, with service in  
St. Alban's church; interment in  
Coleman cemetery.

The pall-bearers were H. Sher-  
ratt, A. Cornez, Fred Deugan,  
Leon Fauville, Ed. Ledieu and  
H. Claes. Many beautiful floral  
tokens were sent by relatives  
and friends, as well as local or-  
ganizations.

Sympathy of many friends is  
extended to the bereaved family.

Mr. and Mrs. George Phillips,  
of Vancouver, are visiting Mr.  
J. T. Hopkins, sr.

## Principal's Case Before Board of Reference

The Journal has been informed  
by William Fraser, chairman of  
Coleman school trustees, that  
the appeal of Principal Hoyle  
against the notice of termina-  
tion of services issued to him  
recently will be heard before  
Judge Matheson in Calgary on  
Aug. 3, and that a representa-  
tive of the trustees will be pre-  
sent to state the reasons for the  
notice being given.

Mr. Hoyle was engaged by the  
school district in 1927, commenc-  
ing as principal in September,  
following the school holidays.  
He had previously been on the  
staff as a teacher, then was away  
for some time in British Colum-  
bia.

The Board of Reference de-  
cides if the grounds for ter-  
mination of teachers' contracts are  
justified, and may order rein-  
statement if reasons given for  
dismissal are not sufficiently  
substantiated.

The Journal has what it takes  
to make a GOOD advertising  
medium—circulation and reader  
interest. You can check off all  
the ballyhoo, arguments, statis-  
tics and what not. If business  
is right, the product is good, and  
the service courteous and fair,  
Journal advertising will do the  
job efficiently.

DINING ROOM SUITE, good as  
new, for sale. Apply The Journal.

### A MIGHTY GOOD INVESTMENT

Your stationery is an adver-  
tisement. It creates a favor-  
able impression, if it is good  
stationery. It creates a desire  
to do business with you, if it  
is clean, crisp, dignified and in-  
viting in appearance.

You believe that good adver-  
tising pays, of course.

Consider the difference in  
cost between a cheap, unattrac-  
tive letterhead, bought strictly  
on a price basis, and a smart,  
distinctive, confidence-building  
one, such as a good printer can  
produce, as money might well  
spent.

You can hardly make so small a  
sum produce such widespread  
and important results. Let The  
Journal plan and print your sta-  
tionery.

### ANNOUNCEMENT

When you take pictures this sum-  
mer don't forget to bring your films  
to us. Take advantage of our sum-  
mer special. We develop any size  
roll for 50c (8 prints) and will also  
give FREE one 5-inch by 7-inch en-  
largement of your best negative.

All sizes of Films for sale.

COLEMAN PHOTO STUDIO

The Journal does 'good print-  
ing at fair prices, which enables  
it to give service and satisfaction  
and to meet its own bills prompt-
